

## 20180219\_AHS Movement Control Update

Report date 19-Feb-18  
Code AHS Movement Control  
Primary author Dr Camilla Weyer

### Areas under movement restrictions

Dear Colleagues

Please note that the following areas are under movement restrictions for direct movement into the AHS controlled area until further notice.

KwaZulu Natal Province  
Mpumalanga Province  
Germiston State Vet Area  
Port Elizabeth State Vet area  
Kimberley State Vet Area

Partial closure of  
Limpopo Province  
North West Province  
Pretoria and Randfontein SV area  
Kroonstad SV Area  
Hoopstad SV Area

For movement applications into the AHS controlled area please continue to submit your applications as per the normal process, and you will be informed should the holding fall within a 30 km radius of a suspect or confirmed AHS case.

For the KZN and MPU please advise your clients that Stop Over Quarantine is definitely going to be required for movement into the controlled area.'

For movement from all other areas the client should be advised that as we are now entering the high risk time of year for AHS, Stop Over Quarantine may very well be required, and they should factor this cost in to their plans for movement from the infected area of RSA into the AHS controlled area

Regards
